

Titouan Renard,

Political Economy Student

☎ (+41) 79 944 61 65

✉ titouan.renard@gmail.com 🏠 [website](#)

📍 Chemin de Mont-Riant 7, 2000 Neuchâtel, Switzerland

Political economy student with a background in robotics and artificial intelligence, I have strong foundations in mathematics, strong abstract reasoning skills, and extensive programming experience. Before political economy, I was mostly interested in optimal control, reinforcement learning and learning theory. Now I am mostly interested in international economics, crises and complexity in economics.

Education

Master in Political Economy of Capitalism , Geneva, Switzerland	2024-2026
Université de Genève	
Master in Economics , Barcelona, Spain (Exchange Semester)	2025
Universitat de Barcelona	
Master in Robotics with a Minor in Data Science , Lausanne, Switzerland	2023
EPFL, STI and IC faculties	
Bachelor in Microengineering , Lausanne, Switzerland	2020
EPFL, STI faculty	
Bilingual Maturité , Neuchâtel, Switzerland	2016
French-English bilingual high-school, Lycée Denis de Rougemont, Major in Physics and Applied Mathematics	

Past Projects

Beyond Imbalances, A Competition Theoretic Account of the US-China Rivalry , master thesis as part of the Master in political economy, under the supervision of Prof. Cédric Durand and Dr. Benjamin Burbaumer. Project graded 6/6	2026
Heterodox (Marxian/Post-Keynesian) analysis of the impact of the second China shock on the US economy.	
Measuring Global Value Chains Integration Using Embodied Labour , seminar paper for the course "Global Sustainability" at Universitat de Barcelona, under the supervision of Prof. Mònica Serrano. Project Graded 10/10	2025
Investigated the labor contribution relative to final demand of different sectors/countries using inter-country input-output (ICIO) tables. Project report online.	
Swiss Financial Diplomacy in the Interwar Period, Preserving Bondholders' Interests in the Context of the Renegotiation of the Ottoman Public Debt (1919-1928) , seminar project at UNIGE under the supervision of Prof. Juan Flores Zendejas. Project Graded 6/6	2025
Investigated the collaboration between Swiss Diplomats and Bondholders using diplomatic archival sources. Project report online.	
Provable Convergence Guarantees for Constrained Inverse Reinforcement Learning , Master in robotics/data science at SYCAMORE (Systems Control and Multiagent Optimization Research) at EPFL, under the supervision of Prof. Maryam Kamgarmour. Project Graded 6/6	2023
Proved convergence guarantees for a constrained IRL algorithm, led to a publication in IEEE CDC.	
Power-Optimal Trajectory Generation for Airborne Wind Energy , semester project at LA3 (EPFL), under the supervision of Prof. Colin Jones. Project graded 6/6 .	2021
Worked on a strongly non-linear and non-convex optimization problem, implemented an appropriate iterative solver method to deal with the non-convexity in Matlab. Project report online.	

Experience

Internships

Research Intern at SYCAMORE (Systems Control and Multiagent Optimization Research) at EPFL, under the supervision of Maryam Kamgarmour	2023
Worked on the sample complexity of Inverse Reinforcement Learning (published work).	
Course Project Design at the Laboratory of Computational Neuroscience, under the supervision of Alireza Modirshanechi	2023
Designed the course project for the Artificial Neural Networks and Reinforcement Learning course at EPFL.	
Machine-Learning Intern at 3HLE Robotics and Automation	2022-2023

Worked on deep-learning models for *6D pose estimation* from rgbd sensor data in the context of industrial robotics manipulation, under the supervision of Laurent Winkler

Summer Internship, at EPFL's Birorobotics Lab, under the supervision of Alessandro Crespi. 2018
Implementation of a simple vision-based localization system using C++ and OpenCV.

Student-Assistant at EPFL

Artificial Neural Networks and Reinforcement Learning 2022-2023
For the Computer Science and Data Science students.

"Physique Générale 1" (Newtonian Mechanics) 2018-2021
For the PH-101(b) (Microengineering, Electrical Engineering and Material Sciences sections) and PH-101(d) courses (for the Mechanical Engineering section).

Media

Journalist, *C'est Réel*, online media 2024-present
Writing, video editing, on-camera presentation in the media's videos, and bookkeeping.

Journalist, *Voix Populaire*, Swiss newspaper, print and online 2023-present
Occasional contributions as a journalist.

Journalist, *Le Canard Huppé*, Lausanne student newspaper, print and online 2020-2023
Writing, editorial work, design and management of the website.

Other

Webmaster for Institut de Psychanalyse Charles Baudouin 2025-2026
Development, maintenance and updating of the institute's website.

Skills

Programming, in C, C++, Javascript, Matlab, Python and R.

Math and Applied Math, Probabilities, Linear Algebra, Calculus, Econometrics. Strong abstraction capacity, ability to mathematically formulate a concrete problem.

Communication, public speaking, writing and team management learned in the context of student associations and media work.

Languages, French (native proficiency), English (full proficiency), German (B2), Spanish (B1)

Volunteer Experience

Unipoly, student's association for sustainability at EPFL. 2019-2022
Board member, then president of the association.

European Youth Parliament, Switzerland 2015-2016
English language public speaking experience.
